

WHAT DO I DO IF I HAVE A SUSPECTED COVID-19 CASE? (UNVACCINATED CLOSE CONTACT/SYMPTOMATIC)

01

Stay Home

Do not come to campus before calling 811, even if you are fully vaccinated.

Follow their guidance re: testing, isolation, etc.

If you are 14 days past your second dose of the COVID-19 vaccine, and asymptomatic, you do not need to isolate, unless directed by Public Health.

02

Report/Test

Notify your supervisor/unit.

You may need to get tested based on guidance from the Saskatchewan Health Authority (SHA).

03

Monitor

Stay home until test is confirmed negative and/or for at least 48 hours or until symptoms subside.

If the test is positive, follow the confirmed positive guidelines set out by SHA.
