

WHAT DO I DO IF I HAVE A SUSPECTED COVID-19 CASE? (UNVACCINATED CLOSE CONTACT/SYMPOMATIC)

01

Stay Home

Do not come to campus or attend class in-person before calling 811, even if you are fully vaccinated.

Follow their guidance re: testing, isolation, etc.

If you are 14 days past your second dose of the COVID-19 vaccine, and asymptomatic, you do not need to isolate, unless directed by Public Health.

02

Report

Notify your instructor about your absence via the mechanism noted in the course syllabus/outline.

03

Monitor

Stay home until symptoms subside and you are no longer COVID-19 positive.

Work with your instructor regarding any missed course work or assessments.
